

Suresh Jayanthi

VP Energy Services

“Chanje is driving critical innovation in the refueling depot business model integrating electric vehicle charging infrastructure with the battery storage, solar and grid services to enable mobility as a service for the medium duty electric vehicle market segment.”

As VP of Energy Services, Suresh focuses on creating and deploying fully integrated energy solutions for Chanje’s customer base. Suresh is leading the engagement with our strategic partners and ecosystem suppliers to deploy modular and scalable infrastructure programs. He is also responsible for implementing turnkey financing packages to deliver energy as a service to captive EV fleet customers.

Over the last 10 years, Suresh executed several auto OEM contracts, public-private partnerships, and utility programs for EV charging infrastructure across the US. Prior to Chanje, Suresh led business development initiatives in electric vehicle charging infrastructure programs as the Head of EV Services for Schneider Electric. There, he successfully built a field services delivery model to support nationwide EV charging station networks. Previously, Suresh served as the Senior Manager for Business Development at AeroVironment where he secured key global partnerships for industrial heavy duty electric vehicles. Suresh also served as President of MassCus Technologies and Senior Director of Global Business Development for 3D Systems.

Suresh has a master’s degree in mechanical engineering from the University of Delaware, and an MBA in strategy, finance, and entrepreneurship from UCLA Anderson School of Business.
