SCHOOL OF PUBLIC POLICY

INTRODUCTION

The economic policy debate between protectionism and global free trade has reached a fever pitch globally, with potential trade skirmishes, battles and wars hanging like a cloud over the global economy. Whether it is rooted in the new populism that gave rise to a new administration in the United States, and Brexit in the European Union, or the growing opposition to multi-national trade agreements – such as the North American Free Trade Agreement (NAFTA) and Trans-Pacific Partnership (TPP) – on the left and right, or the ebbs and flows of various goods around the globe, the potential for threats to historical trade models and routes seem greater than any time in recent history.

Southern California is a major hub for the global economy, and as a result, it is a critical bellwether of the state of global trade. Building on the World Trade Center Los Angeles (WTCLA) and the Los Angeles County Economic Development Corporation's two-year series of publications on foreign direct investment (FDI) in Southern California, this year's report continues to describe the shifting patterns of trade throughout the six-county Southern California economy (covering Los Angeles, Orange, San Diego, San Bernardino, Riverside, and Ventura counties).

This report supplements those prior reports by providing a deeper understanding of the provenance of the foreign-owned enterprises (FOEs) that comprise the data in this study. It also provides some deeper understanding of the business flows into the mega-region that are impacted by three of the flashpoints

in the global discussion around trade and investment flows: (1) the departure of the United Kingdom from the European Union (aka "Brexit"); (2) efforts by the United States to redefine and renegotiate NAFTA; and (3) the escalating trade tensions between the United States and China (page 6).

There are now an estimated 10,378 foreign-owned firms in Southern California, representing approximately 1.2 percent of all firms in the region. Together, these firms have 427,954 employees, representing 5.4 percent of the region's workers, with wages of almost \$27 billion (Table 4).

Japan is the leading source-nation for FOEs in the region with 2,541 firms, accounting for more than one-fifth of the total FOE employment with 85,874 employees and \$5.4 billion in wages. The United Kingdom remains in second, with 1,167 firms employing 63,739 workers with a total estimated \$3.6 billion in wages. Canada, France, and Germany round out the top five source-nations. And the geographic diffusion of these FOEs throughout the region is increasing with a slightly smaller share of these firms located in Los Angeles County this year, dropping from 48.4 percent to 46.9 percent (Table 1).

Retail and wholesale trade continue to have the largest number of firms, with 2,404 and 1,704 firms, respectively, and manufacturing places third with 1,588 firms. On the employment and payroll side, however, manufacturing dominates the FOEs, accounting for nearly one-third of all payroll jobs (147,830) and nearly 40 percent of all wages paid (\$10.4 billion).

ABOUT WORLD TRADE CENTER LOS ANGELES

The World Trade Center Los Angeles (WTCLA) is dedicated to attracting foreign direct investment and facilitating business opportunities between Los Angeles and international companies. WTCLA is a non-profit organization that provides business assistance services to international companies seeking to locate or expand their business operations in the Los Angeles Region, and to local companies seeking to export products or services to international markets.

ABOUT THE PEPPERDINE SCHOOL OF PUBLIC POLICY

The Pepperdine School of Public Policy is one of the nation's premier master-degree programs in the burgeoning field of public policy. The school applies founding American principles of personal liberty and market-driven solutions to both train future public policy leaders and inform contemporary policy dialogues and decisions. The School's faculty and programs engage the policy community across a wide range of public policy issues, domains and approaches.
